

Sixth Circuit Hedonic Fun +
Games Transmission

Dear Tim.

Just finished reading Anton Wilson's Cosmic
Trigger thing

Does he miss the 12th Planet mass of evidence
which includes a multitude of pictures of hawk-
headed dukes who apparently were the transportation
division?

McKenna brothers hologram universe
explanation seems identical with the current
notion of pos + neg universe - matter-anti-matter.

I recently had an intuition vision (I can't
usually feel a comfortable signal for that kind of
event) of anything as an advancing, constantly
changing wavefront, comprised of parallel equation-
series, each in turn related ^{to} conditioning all
the other (series, equations) Ties in with the 8x8
& 64 hexagram explanations.

Gurdjieff is so crazy, crazy generally but
I was moving at anti-mach VI & VII on acid one
time & Ursula read me some of his stuff - from
The Tales I think - & he came across as incredibly
clear & profound. A real wild card.

By the logic, flowers & plants should thrive
on top of a pyramid since it takes energy & beams
it outward (the plants getting a healthy dose) as a
travel beacon for light or supra-light travel -
a heavy thought is that the earth may be being
drained, rather rapidly of that kind of energy because
of it. The UFO manifestations (= that which plays below

Scenario: M. Hollerbach does his count, notes
number 1, lobby with the Queen of England to look
her, and to finance the first atomic power and Jack
we premise to bring back vital information, right
of it, micro-mini discomputation, 4, set, x
crave to allow her, six de bit new coverage on hole, into which one would step - & return when someone
is about private bank, so she can get the jump
on the interstellar markets etc.

criticized mass in flight?) seem to prefer the Bermuda Triangle = where a pyramid-beacon is supposed to be below water rather than Egypt — wonder if the Egyptian ones were below water once, maybe during the flood.

The number 4500 years for a past cycle corresponds to the short period of 12 the Planet, the McKenna's calculation of 2011 or 2012 as "jackpot" rings a real bell with what I remember was said about what little can be deciphered about the inscriptions on a ruin in south america, whoever it was ~~is~~ supposed to return in 2011. (p. 217-18)

I think time runs in a cycle of acceleration & deceleration, 2011 could be a "compression" acceleration point — & the "best" therefore for space-travel?

I firmly believe that the physical evidence, south american square-chunky, Easter island stolid-gigantic, mothman, silver-green dwarf, hawk-headed warrior, horned helmeted blond Apollo, black suited yellow men (I Ching says the superior man is yellow), snake, points to visitation manifestations by a variety.

For some time have been beaming neural wave-lengths "spaceward" probing contact. For some time I've been creating my fortunes & scene deliberately-consciously with a fluctuating but pleasingly successful "statistician". For some time, from time to time, I have suddenly been in subtle but incredibly clear contact with you it seems — (that's a little heavy for matter-of-fact statement even yet) I remember some times while you were in prison & out of letter contact — rougher than usual.

Hardest thing is to watch the best minds miss the full import of the ourselves-in-the-future concept & project pictures
Radiate On! Neil
